

CMT EXAM

Because I change vagrantfile from port forward to private_network, I cannot get the page "hello CMT!"

However, I can prove that ansible tool works well by the screenshot. According to the Task: Create public directory, Ansible has create a file under directory /var/lib.gitea/custom/public.

```
TASK [do1jlr.gitea : Create public directory for custom public web files] *****
changed: [gitea] => (item=/var/lib/gitea/custom/public)

TASK [do1jlr.gitea : Transfer custom public web data] *****
changed: [gitea]

RUNNING HANDLER [do1jlr.gitea : Restart gitea] *****
changed: [gitea]

RUNNING HANDLER [do1jlr.gitea : Reload systemd] *****
ok: [gitea]

PLAY RECAP *****
gitea          : ok=48  changed=19  unreachable=0  failed=0  skipped=9  rescued=0  ignored=0
```

Moreover, when I login the server, gitea, I can curl localhost:3000

```
[vagrant@gitea ~]$ curl localhost:3000
